PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5+ years of experience building and maintaining production web and mobile applications using React, React Native, TypeScript, and Node.js. Proven track record leading frontend teams, optimizing Core Web Vitals and application performance, and delivering end-to-end features across healthcare, e-commerce, and EdTech domains. Experienced with cloud deployments on AWS and Google Cloud Platform, CI/CD pipelines, and agile cross-functional teams. Available for senior contractor and full-time remote roles.

EXPERIENCE

Full-Stack Engineer (Contractor) | Plannery | 2024 – Present

- Developed a React Native mobile application for healthcare finance, enabling users to track transactions, visualize spending via interactive charts, and configure custom spending limits.
- Built and maintained React web application features through which clients apply for financial checkups and loan products, owning both frontend and Node.js backend across the full request lifecycle.
- Leveraged Redis for pub/sub messaging and job queuing, decoupling async workflows and improving platform responsiveness.
- Integrated LoanPro API for real-time payment tracking, improving financial data accuracy for end users.
- Set up and maintained automated testing suites including unit and integration tests, reducing manual QA overhead and improving deployment confidence.

Frontend Lead | Patagonia Chic | 2023 – 2024

- Led development and maintenance of a Next.js booking platform for Patagonia tours, owning the full frontend codebase, architecture decisions including a Screaming Architecture folder structure, and Vercel deployment pipeline.
- Implemented SSR, SSG, and ISR rendering strategies per page type to optimize both performance and SEO, improving search engine indexing and reducing time-to-first-byte.
- Optimized Core Web Vitals through code-splitting, lazy loading, tree-shaking, and image optimization, achieving measurable improvements in Lighthouse scores and conversion rates.
- Set up CI/CD pipelines integrating Lighthouse CI for performance regression testing, Reassure for React component render performance, and Playwright for E2E test coverage, preventing performance regressions from reaching production.
- Applied technical SEO best practices including structured metadata, canonical URLs, and semantic HTML across the booking funnel. Implemented Redis caching for static and semi-static data, reducing database load and improving response times.

Full-Stack Developer | Evaluados | 2021 – 2023

- Started as the sole mobile developer, building a React Native app that enabled students to complete questionnaires and surveys across iOS and Android, including Detox E2E test coverage.
- Grew into ownership of the frontend teacher backoffice (React), coordinating a team of 3 developers, establishing component library adoption and driving architecture and implementation decisions.
- Delivered and maintained both web and mobile platforms using React, React Native, and TypeScript, ensuring seamless UX integration between teacher and student experiences. Implemented background job processing with BullMQ and Redis caching for frequently-read data.

Full-Stack Developer | Freelance | 2019 – Present

- Architected and built an offline-first React Native application for sales order recording using WatermelonDB as the local database, with a persistent sync queue that resumes automatically on app restart, ensuring zero data loss for field sales reps operating without internet connectivity.
- Implemented a multi-tenant architecture supporting multiple clients with isolated data, dynamic per-client forms, and custom UI configurations, all reconciled through a background sync layer that picks up exactly where it left off across sessions.
- Designed and deployed a serverless API on AWS using Lambda and DynamoDB, provisioned entirely with AWS CDK (infrastructure as code) and monitored via CloudWatch logs and alarms.

TECHNICAL SKILLS

Frontend & Mobile:

JavaScript, TypeScript, React, React Native, Expo, Expo EAS, Next.js (SSR/SSG/ISR), Redux, Zustand, XState, HTML5, CSS3, Sass/SCSS, TailwindCSS, WatermelonDB

Backend:

Node.js, Express, NestJS, Prisma, TypeORM, PostgreSQL, MySQL, Firestore, Redis, BullMQ, REST APIs, JWT, OAuth, C#, [ASP.NET](#), .NET Core

Cloud & DevOps:

AWS (Lambda, DynamoDB, CDK, CloudWatch), Google Cloud Platform (GCP), Docker, Vercel, CI/CD, GitHub Actions, Lighthouse CI

Testing:

Jest, Vitest, React Testing Library, Playwright, Cypress, Detox (mobile E2E), Reassure, Lighthouse CI

Architecture & Tooling:

Screaming Architecture, Design Systems, Component Libraries, Offline-first, Multi-tenant, Git, Bitbucket, Jira

EDUCATION

Systems Engineering | Universidad Tecnológica Nacional FRLP | March 2018 – June 2023

La Plata, Buenos Aires, Argentina
